

Response to Reviewers

Reviewer 1

Reviewer 1 – comment 1

The authors should clarify how immortal time bias is handled in the emulation.

We thank the reviewer for this important point. The overlap of propensity scores has now been assessed graphically (see the method in the manuscript). (modified on p. 1)

Reviewer 1 – comment 2

The positivity assumption is not discussed.

The positivity assumption is now assessed graphically.

p. 1 – The positivity assumption is now assessed graphically, see Figure 1.

p. 1 –

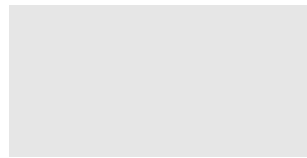

Figure 1: Distribution of propensity scores.

Reviewer 1 – comment 3

Please double-check the wording of the discussion section.

We have kept this wording, which we believe remains appropriate at this stage. (see p. 1)

Reviewer 2

Reviewer 2 – comment 1

A sensitivity analysis would strengthen the results.

A truncation-based sensitivity analysis has been added, as suggested by [1]. (modified on p. 1)

For reference, the propensity score figure is Figure 1, p. 1.
